- Ecological and Environmental Management
- Due Diligence for Property Acquisition

Aggregate Resources

Skelton, Brumwell & Associates Inc. April 2010

Deadline for Class A Licences

The Ontario government designated additional private lands in southern, central and northern Ontario under the Aggregate Resources Act (ARA) in January 2007.

In order to lessen the impacts on aggregate operators who were granted a Class A Licence under the "Grandfathering Provisions" of the ARA, the ministry took a number of steps including the phasing in of the notices for Site Plan preparation and approval. Once an operator has received a notice, the Site Plan must be submitted to the MNR within 6 months.

The last of these notices have now been issued for Class A Licences.

For a Class 'A' Licence, the Site Plan must be prepared under the direction of and certified by a Professional Engineer, Ontario Land Surveyor, Landscape Architect or any other qualified person approved, in writing by the

Minister. Two of our senior staff are approved by MNR to prepare and certify Site Plans under the ARA.

If you have recently received your notice we can help you with the preparation of your Site Plan.

ENGINEERING PLANNING ENVIRONMENTAL MANAGEMENT

We Have The Experience

We have experience dealing with operators and municipalities in areas that are newly designated, and have prepared Class A and B Site Plans for Grandfathered Licences.

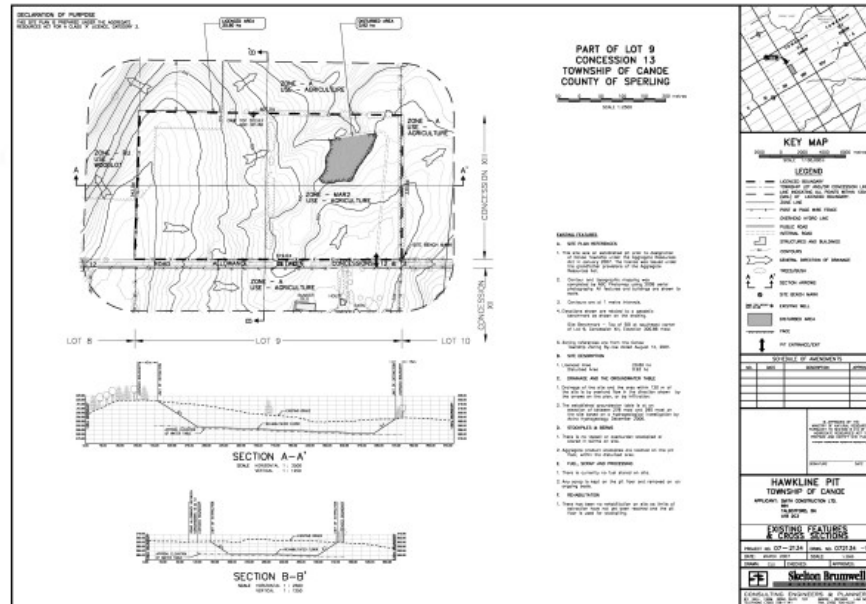

In 2007 we were retained by the Ministry of Natural Resources to prepare generic Site Plans for Class A and B Licences in areas newly designated that would illustrate the Site Plan requirements under the Aggregate Resources Act.

Since that time we have received approval on more than 20 Class A & B Site Plans.

Anne Guiot is a Senior Planner specializing in all aspects of aggregate re-

sources. Anne joined Skelton, Brumwell in 1989 after 5 years with MNR.

Trudy Paterson is a Senior Planner with responsibility for coordination of aggregates projects and preparation of Site Plans.

Celebrating 40 Years

Skelton, Brumwell & Associates Inc. has been providing consulting engineering, planning and environmental management services in Barrie since 1970. We have developed a reputation for providing quality work and achievement on projects for both public and private sector clients across Central Ontario.

Since the introduction of the Pits and Quarries Control Act in 1972, Skelton, Brumwell has been actively involved in Aggregate Resource planning and development on more than 300 projects for over 75 clients.

We provide comprehensive services including project coordination for municipal planning approvals and licensing of pits and quarries.

We have professional land use planners, engineers and technologists, an environmental planner/biologist and a landscape technologist in-house. Our expertise in pit and quarry design and rehabilitation, planning reports, hydrology and related Permits to Take Water and Certificates of Approval for Discharge, environmental impact studies, and traffic analysis ensures all our client's needs are met.

Skelton Brumwell staff have successfully coordinated ARA Open Houses and represented Clients before Municipal Councils and Public Meetings, as well as at the Ontario Municipal Board.
