

# WATERSHED PLANNING

Skelton, Brumwell has been providing quality and trusted consulting services to clients for over 45 years.

We have extensive experience in environmental sciences, ecology, hydrology and land use planning critical to successful integrated watershed management.

Our staff have direct working experience with the federal government, provincial ministries, conservation authorities, municipalities, First Nations, NGOs, and educational institutions in the field of watershed planning.

We pride ourselves in bringing forward innovative, science-based practical solutions to dealing with the important

aspects of responsibly planning for and managing all of the components of healthy watersheds.

Our team can provide you with reliable science, integrated and comprehensive analysis, extensive experience in policy development and expertise in meaningful engagement.

We can also assist with environmental education and awareness initiatives including the use of social media and citizen science projects.

We focus on providing value added services that are concise and our goal is to provide those services as efficiently as possible.
