

ECOLOGICAL SERVICES

Skelton, Brumwell has been providing quality and trusted consulting services to clients for over 50 years. We have extensive experience in providing environmental services on a wide range of projects throughout Ontario. Our staff have extensive experience in environmental and ecological services with municipalities, conservation authorities, NGOs, provincial and federal agencies, First Nations and private sector clients.

We have provided ecological and environmental services related to aggregate, residential, industrial and commercial projects as well as golf courses, ski resorts and other recreational projects. We are experienced in the development of natural heritage policy and mapping, the review of environmental impact studies and other environmental information. We can also assist with environmental education and awareness initiatives including the use of social media and citizen science projects.

We provide our clients with up-to-date and accurate information to ensure that development projects can be approved and proceed without having a negative impact on the environment. We focus on providing value-added services that are concise and our goal is to provide those services as efficiently and effectively as possible.
